Comment:

We would like to see a footpath between Trefonen and Treflach. We were involved in an incident when my wife was hit by a transit type van along this stretch of the road when the vehicle did not move out and we had no area to escape. This was reported to the Police who took statements and resulted in a visit to hospital.

Due to the increase volume of delivery traffic a 20 mph limit would make sense around the narrow lanes of Trefonen.

Regarding development the character of Trefonen should be maintained. New development on brownfield or infill only.
