

**Response to feedback email received from
Alan Martin on 11th March 2016**

Thank you for your comments made in your email dated 11th March 2016.

Throughout the update process, we have been following all the guidance indicated in your bullet points. This is also the case for Steering Group who created the 2006 Village Design Statement.

With regard to your comments on Part 4 Policies: the 2006 document, much appreciated by the planning authorities, made recommendations. These were subsequently accepted by the Parish Council as their own policies. An officer of the planning authority guided the identification and submission of some of the recommendations as Material Planning Considerations. Those adopted then became Material Planning Considerations of the planning authority.

Apart from any updates to reflect the passage of time (e.g. *a web site shall be developed* is changed to *it has been*), only the words in italics in Section 4 are new at this update. Clearly the Parish Council and the Planning Authority may decide to “un-adopt” any of their original policies/ Material Planning Considerations and adopt some or all of those new ones added at this update.

Thank you for taking the time to Have Your Say on the 2016 update of the Trefonen, Treflach and Nantmawr Village Design Statement

Best Regards

The Steering Group
